

# GPFI Financial Consumer Protection and Financial Literacy Subgroup: 2016 Work Plan

## Objective of the subgroup

The objective of the FCPFL Subgroup for the next five years is to build the capacity of developing and emerging economies to implement audience-appropriate, evidence-based financial consumer protection and financial literacy programs. Additionally, the Subgroup will identify best practices, emanating from the public, private, and NGO sectors, in consumer protection and financial education policies that support use of digital financial products and services. The Subgroup will continue its efforts, consistent with the G20's 2013 St. Petersburg Development Outlook, to increase incentives, financial education, financial literacy, and consumer protection for the poor, with emphasis on vulnerable groups such as women, youth, and migrants.

# **Subgroup Structure**

Provide the following information for each subgroup:

- Co-chairs (countries): China, Russia, and the United States
- Countries participating in subgroup work (non-G20 and G20): Argentina, Australia, France, Germany, Italy and Mexico
- Subgroup Implementing Partners: AFI, CGAP, , OECD, WB/IFC

## **Key Outcomes**

- 1. Improve the capacity of public authorities and other relevant stakeholders to develop and implement financial literacy and consumer protection measures.
- 2. Promote consumer protection and financial education good practices for digitally delivered financial products and services.

### **Detailed expected outcomes:**

- The Subgroup will assist implementing partners and others in developing targeted and
  practical guidance for country-level implementation, by promoting voluntary peer review
  and exchange, private sector engagement, coordinated inputs into global FCPFL
  deliberations, and the identification/filling of gaps that are particularly important in the
  context of financial inclusion.
- 2. The Subgroup is recognized as the hub within the GPFI for technical content on FCPFL risks and solutions associated with digitalized finance, and will provide inputs to other GPFI Subgroups developing policy options with direct implications for consumers or that require consumers to have a minimum level of financial literacy when using such a financial product or service.

3. The subgroup will promote the development of surveys on financial literacy using the methodologies welcomed by G20 leaders in 2013 and supported by the Russian Trust Fund: the OECD/INFE methodology to develop cross comparable data (and the WB methodology for in-depth country surveys) in all G20 countries and interested non-G20 countries so as to compare, evaluate and improve the effectiveness of financial education, and recognize the financial needs of consumers particularly important in developing targeted financial inclusion.

# **Timeline of Events and Outputs in 2016**

Date	Event	Location	Activities			
GPFI EVENTS						
1-3 March	GPFI Workshop on financial inclusion indicators and GPFI Plenary	Shanghai
